

What Can I Expect From a USATestprep Demo?

One-on-one attention, your questions answered, and a deep dive into the available features of the USATestprep platform--these are the top reasons teachers and administrators list for why they recommend doing a demo of our state-standards aligned platform.

Q: How long does the demo last?

We schedule demos for 20 minutes. However, we're happy to accommodate a longer session. We often do this for schools and districts that have several teachers on the demo as the Q&A may run long.

Q: What topics are covered?

That's up to you! Most educators are looking for a general overview of how the USATP platform works. However, if you have a specific feature you're interested in, such as easy-click remediation, we can spend all (or part) of our time there.

Q: Do I need to be in a free trial to have a demo?

While we do find it's helpful if you have had access to the USATP platform, being in a trial with us is entirely optional. Many teachers skip the trial and use the demo as a quick and easy of evaluating our platform.

Q: What happens after the demo?

After the demo, you'll have unlimited access through the free trial to start using USATestprep. The trial lets you upload your students, access our full item bank, build assessments, schedule assignments, and set up progress monitoring. And if you run into question at any time, we're here to help!

Q: How many people can be on a demo?

That's entirely up to you! We're happy to do a 1:1 walkthrough, but we've had entire classrooms of teachers online for a single demo. If it's possible to have a decision-maker from your team on the demo in order to see the benefits firsthand, we find this to be a time-saver if and when you're ready to purchase.

Q: What are the next steps after the demo is complete?

If you like what you saw and would like a quote or pricing information, we'll provide that. If you'd like to start or continue in a free trial to use the knowledge gained through the demo, that's highly recommended. Or if you would like to invite your administrator or colleagues for a second walk-through, we'll get that scheduled as well.

Q: Who do you recommend to attend a demo?

As there's nothing to lose, there's no one who can't benefit from attending a customized walkthrough. You'll receive personalized attention so we cover the areas that matter the most to you, and you'll have someone on hand to answer your questions in real-time. The demo can be as quick as 5-minutes to run through a specific feature or extended for a deep dive into how you can use USATestprep for classroom and remote learning.

"USATestprep is a GREAT resource for distance learning, as well as in the classroom setting. It is aligned to state standards and teachers can see real data and then use it to create meaningful and relevant lessons."

-M. Ward, Missouri Teacher
